United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

Authorized Support Representative

To locate the support representative for your country, visit the Product Support webpage on the Grass Valley website: www.grassvalley.com/support/contact.

Important Notification

EDIUS 8 requires SHA-2 hash algorithm code signing for Grass Valley hardware driver installation. All versions of Windows 7 and Windows 8 / 8.1 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires the installation of TWO Security Updates on Windows 7 in order to install Grass Valley hardware.

They MUST be installed in the following order:

1. [Security Update for Windows 7 for x64-based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-based Systems \(KB3033929\)](#)

Known Issues

Another EDIUS ID can be registered

Description: If an EDIUS ID is created and an EDIUS serial key is activated and attached to that ID, and another optional serial key is subsequently added (for example, a DNxHD license), it is possible to manually change the EDIUS ID at that point. This is a design flaw in the system – you should NOT change the EDIUS ID, because this will confuse the GV License Manager and EDIUS will not start.

Workaround: None

Batch export not working for H.264/AVC export

Description: If H.264/AVC file export is registered to a batch export job, the exported clip is corrupted.

Workaround: None

Cannot deactivate EDIUS license if you don't have administrator rights

Description: If a user is logged into Windows with a standard or guest account, the EDIUS license will not be deactivated even if uninstalling EDIUS.

Workaround: Log into Windows as an administrator and then deactivate the EDIUS license.

Applying Gaussian Blur can slow down file export

Description: If Gaussian Blur filter is applied, it may take an unusually long time to export the file on a PC that supports the AVX instruction set.

Workaround: None
