Phone Support

Customers with service contracts can use the following numbers to call support.

United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

Important Notification

EDIUS 8 requires SHA-2 hash algorithm code signing for Grass Valley hardware driver installation. All versions of Windows 7 and Windows 8 / 8.1 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires installation of Windows 7 updates in order to use Grass Valley hardware. There are following two ways to support SHA-2 code signing:

Obtain the latest update (recommended)

Obtain the latest update from Windows Update

Install two security updates

Install TWO Security Updates on Windows 7. Download stand-alone installer files from Microsoft website then run the installer. They MUST be installed in the following order.

1. [Security Update for Windows 7 for x64-based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-based Systems \(KB3033929\)](#)

If they have not been installed, EDIUS installer will ask you to install the security updates.

New Features of Version 8.53.2808

This update provides the following additional features:

EDIUS

- EDIUS 8 allows to install EDIUS 9 simultaneously on same PC.

Update History

The following issues are fixed or improved in this version:

EDIUS

- Alpha layer is corrupted when loading certain PSD clip
- Storm Pro suddenly does not output correct SD video (SFDC00575744)
- EDIUS freezes if normalize canceled while generating waveform (SFDC00586008)
- EDIUS cannot export 59.94 or 50p H.264 clip that has lower than 4Mbit bit-rate (SFDC00580942)
- EDIUS fails to open certain HQ AVI clip (SFDC00583246)
- Line noise appears on timeline rendered clip if layouter applied (SFDC00597004)
- EDIUS incorrectly handles XAVC color space information recorded by Sony F55 camera (SFDC00598601)
- EDIUS ignores clip enable/disable settings when importing FCP XML
- EDIUS crashes on transferring XAVC clip to bin (SFDC00599897)
- EDIUS crashes when exporting 1 frame duration MP4 clip
- EDIUS freezes when loading certain H.264 transport stream clip

- EDIUS fails to import H.265/AAC MP4 clip encoded by Adobe Premiere CC 2017

Known Issues

EDIUS

Black level slightly shifts in display light based color space conversion

If you convert color space from HDR gamma to SDR gamma on display light base, black level is slightly shifted.

Proxy size settings does not work on base-band capture device preset

If you choose "Hires and Proxy files" when creating base-band capture device preset, EDIUS always generates Medium size (960x540) proxy clip.

EDIUS slowly runs while MPEG2 file export

If primary color correction is applied and GPU works for the effect, EDIUS slowly works when exporting timeline to MPEG2 clip.

Mync

Mync displays low quality picture for small frame size picture

When browsing small frame size still images in Mync, displayed picture quality will be low.

FTP upload cannot be aborted

If multiple clips are being transferred to FTP site, it cannot be aborted.

Design Limitations

Restrictions after Uninstallation of QuickTime for Windows

The following functionality will be lost if QuickTime is uninstalled:

Still Image File Formats: Flash Pix; Mac Pict; QuickTime Image

MOV Video File Formats: 3GP; 3G2; M4V or some MOV file formats

Audio File Formats: MOV (other than Linear PCM and AAC); QuickTime Audio

Exporting AAF Files

In the [Project Exporter (AAF)] dialog box, selecting [Type: 1] in [Preset] exports files in AVI (Grass Valley HQ) instead of QuickTime (H.264).
